

insulate, protect and save...

filigree makes it **COOL**

Protect those that you love and the things that you love by lining your curtains with Filigree Linings.

Climate change means our summers are becoming harsher. You can protect your home contents against the harmful effects of UV rays such as fading and disintegration, with drapes backed with Filigree Linings.

You can also protect the environment by cutting your home's greenhouse emissions by reducing power for cooling. Keep heat in its place – outside in summer and inside in winter.

Filigree makes it cool.

filigree makes it **WARM**

Heat loss occurs more readily in winter where your windows are prone to condensation and chill. Just a single degree fall in temperature in your home adds 10% to your heating bill. Heat loss savings of up to 40% can be achieved with heavy curtains, pelmets and Filigree Linings. This effectively reduces your heating costs and your home's carbon footprint. It has never been easier to achieve the optimal 5 Star energy rating with Filigree Linings, where protection means saving.

Filigree makes it warm.

Filigree is a proudly Australian owned company.

filigree makes it **DARK**

You can't control the daylight but you can control your day with Filigree Linings. Filigree Linings offer a choice of three UPF grades of ARPANSA, the Australian and New Zealand regulatory authority, approved linings. Ideal for shift workers, babies or home theatres, Filigree Linings turn day into night, offering room darkening, privacy and protection.

Filigree makes it dark.

All Filigree Linings fabrics have an Ultraviolet Protection Factor rating.

filigree makes it **QUIET**

Ambient noise can be kept to a minimum by using curtains backed with Filigree Linings.

Noise is absorbed creating a peaceful environment for babies, children and adults.

Filigree makes it quiet.

Use any Filigree Linings product and enjoy the confidence of Filigree's 2 year guarantee. Conditions apply.
